WO 2005/076824 PCT/US2005/002594

## **CLAIMS**

## What is claimed is:

- 1. A method of treating irritable bowel syndrome (IBS) in an individual, the method comprising administering to the individual an effective amount of a therapeutic nucleic acid to reduce at least one symptom of IBS in the individual.
- 2. The method of claim 1, wherein the therapeutic nucleic acid comprises a nucleotide sequence of the formula 5'-CG-3'.
- 3. The method of claim 2, wherein the therapeutic nucleic acid comprises a nucleotide sequence of the formula 5'  $(TCG)_{n}$ -3', where n is any integer that is 1 or greater.
- 4. The method of claim 2, wherein the therapeutic nucleic acid comprises a nucleotide sequence of the formula  $5'-N_m-(TCG)_n-N_p-3'$ , wherein N is any nucleotide, wherein m and p are independently zero or 1-200, and wherein n is any integer that is 1 or greater.
- 5. The method of claim 1, wherein the therapeutic nucleic acid is administered via a gastroenteral route.
- 6. The method of claim 5, wherein the gastroenteral route is oral, intranasal, intragastric or rectal.
- 7. The method of claim 1, wherein the therapeutic nucleic acid is administered by a systemic route.
- 8. The method of claim 7, wherein the systemic route is intradermal, intramuscular, subcutaneous or intravenous.
- 9. The method of claim 1, further comprising administering a serotonin 5HT3 antagonist.
  - 10. The method of claim 1, further comprising administering a laxative.

WO 2005/076824 PCT/US2005/002594

11. The method of claim 1, further comprising administering an antispasmodic agent.

- 12. The method of claim 1, further comprising administering an antidepressant.
- 13. The method of claim 1, further comprising administering an antidiarrheal agent.
- 14. The method of claim 1, wherein the therapeutic nucleic acid is formulated with at least one food-grade carrier.
- 15. The method of claim 14, wherein the food-grade carrier is selected from the group consisting of olive oil, an emulsifier, a soluble fiber, a flavoring agent, a coloring agent, an edible fiber, and a sweetener.
- 16. The method of claim 15, wherein the soluble fiber is selected from the group consisting of pectin, carrageenan, alginate, guar gum, locust bean gum, psyllium, xanthan gum, gum arabic, fructo-oligosaccharides, inulin, and agar.
- 17. The method of claim 15, wherein the emulsifier is selected from the group consisting of propylene glycol monostearate, sodium stearoyl lactylate, calcium stearoyl lactylate, a monoglyceride, a diglyceride, a mono-diglyceride a polyglycerol ester, a lactic acid ester, polysorbate, a sucrose ester, a diacetyl tartaric acid ester of mono-diglycerides, and a citric acid ester of monoglycerides.
